

# Ballistic<sup>F1</sup>

**Maturity:**

A strong growing plant with a vigorous vine. Good fruit setting ability.

**Habit:**

A reasonably open plant, erect and easy to pick.

**Fruit:**

Ballistic fruit are straight and medium to dark green in colour. They grow to their length and then begin to swell evenly along the fruit. They appear to be more tolerant to bulbing than many other varieties.

**Harvest Season:**

Ballistic is used from very early season sowing during June in Northland to main season throughout NZ to the end of harvest in May-June.

**General:**

High yielding variety with very high percentage of tag ones. Good shipping and storage ability.

**Disease Resistances:**

IR to Px

**Disease Key:**

Px - Powdery mildew (*Podosphaera xanthii*)
