

# AZTEC<sup>F1</sup>

**Type:**

Rock melon. Trial code MEL 0243

**Fruit:**

Weight 1.6-2.0kg with a medium small cavity. Fruit is oval in shape with sutures and mild ropey net. Flesh has a great melon flavour (as a melon should be), firm with excellent colour, brix of 12-14%.

**Harvest Season:**

Good setting mid maturing variety. Good results throughout both Islands even under poor conditions. Fruit slip, but it is better to pick earlier.

**Characteristics:**

Sutured melon with a mild ropey net and medium small cavity. Yields well with good fruit numbers, shipping and storage ability. Plant has good canopy cover and a strong vine.

**Disease Resistances:**

HR to Gc 1,2, Fom

**Disease key:**

Gc- Powdery mildew (*Podosphaera xanthii*)  
Fom - Fusarium wilt (*Fusarium oxysporum* f. )
