

Raptor ^{F1}

Maturity:

Raptor is a reliable variety that can be sown all year round.

Plant:

Strong vigorous leaf which tolerates summer conditions better than the market standard. Small-Medium sized leaf attachment.

Bulb:

Dark red internal colour with smooth skin. Good brix at 120 setting the level in the market. Raptor has a small tap root and a very uniform and globe shape — better than the market standard

Characteristics:

Suited to fresh market and processing. Versatile globe beet for baby or bunching. Uniform globe shape and yields well.
